

Herding Elephants

## Featured Project

# Qdoba Fry Lines Flooring Project

## Description/Scope

- Removed existing tile under fryers
- Prepped existing concrete subfloors
- Installed Dur-A-Flex® flooring

## Elephants (unique challenges)

- Needed to remove old flooring, prep subfloors and install new flooring in one night (midnight to 8 a.m.)
- Needed to find a product that would not be compromised by grease
- Needed to find a product that would dry quickly enough to be ready for traffic the next day
- Needed to take delivery of product at PSI headquarters and travel with it because client lacked storage capacity

## Highlights

- Dur-A-Flex® life is six to 10 years without repairs (client was repairing and tiling monthly)
- New aesthetically pleasing flooring saves time and money and reduces slips and falls
- Client eliminated inspection/health code issues (food in the grout)
